

## PRIME MINISTER

**STATEMENT BY THE PRIME MINISTER, THE HON P J KEATING MP**

**MR GRAEME CAMPBELL**

In recent months, Mr Graeme Campbell has on several occasions placed himself in direct public conflict with the platform, policies and rules of the Australian Labor Party.

As a member of the Federal Parliamentary Labor Party, Mr Campbell has had every opportunity to advocate the views he genuinely holds in relation to immigration, the racial composition of the Australian population, French nuclear testing and forest policy within the policy processes of the Caucus and the Party.

However, his views on these matters have not found majority support within the Caucus, the government or the Party.

His continued public advocacy of these views, and his attendance at meetings of such groupings as Australians Against Further Immigration and the League of Rights, are matters that must be considered by the National Executive of the Australian Labor Party.

The National Executive should consider all the circumstances of Mr Campbell's public statements and actions, and determine whether he is best able to continue to represent the Labor Party's interests in the seat of Kalgoorlie.
