P. M. No. 91/1966

PRIME MINISTER'S HEALTH

Apart from dealing with a few pressing Governmental matters from his sick-bed, the Prime Minister has had a restful day.

His doctor examined him again this evening and found that the virus was taking its normal course.

He has prescribed sedatives to ease the chest pains that are a symptom of viral pleurisy.

CANBERRA,

23rd September, 1966.
