P.M. No. 94/1966PRIME MINISTER'S HEALTH

Mr. Holt is spending his fourth day in bed at the Lodge recovering from a mild form of viral pleurisy.

His doctor who examined him again this morning is satisfied with the Prime Minister's progress.

Exactly when Mr. Holt will be able to return to work will depend on his further progress, but the Prime Minister is hopeful that he will be able to attend to at least some of his parliamentary duties during the week.

He will not now be opening the CSIRO exhibition in Kings Walk tomorrow morning.

G. L. RPA,

26th September, 1966.
